

Multidisciplinary International Research Journal of Gujarat Technological University

Review Policy

This journal uses double-blind peer review, which means that both the reviewer and author identities are concealed from the reviewers, and vice versa, throughout the review process. To facilitate this, authors need to ensure that their manuscripts are prepared in a way that does not give away their identity.

All received manuscripts are blindly reviewed by reviewers appointed by GTU for the originality of content, methodology, literature review and research gap, analysis part, research findings and its relationship with objectives, drafting, flow of information and paper writing skills etc.

Marks will be given by reviewer during blind review process. Total marks will be 75. The marks are segregated on below mentioned criteria.

S. No.	Particular	Marks
1	Objectives and Methodology	15
2	Literature Review and Research Gap	15
3	Analysis Part	25
4	Finding and its relationship with Objectives	10
5	Drafting, Flow of Information and Paper writing skills	10
	Total	75
	Minimum Required Marks (60%)	45

In case of conceptual paper / case study, above points will be evaluated with practical approach by reviewer. For example, a conceptual paper may not have much analysis of data, but in this situation reviewer will focus on arguments by which new concept is derived or presented. Similarly a case study may not have much literature review, but in these type of papers reviewer will have to give weightage to the method by which the problem is identified or stated.

Editorial board shall consider total marks given during review process, originality of manuscript, quality / novelty of research work etc. to accept or reject the manuscript.

University reserves the right to accept or reject any manuscript without stating any reason to the author(s).
